RE: LIFT MAINTENANCE PROCEDURE

Total number of pages including cover sheet: 1

1) We wish to emphasize again - **DO NOT WORK ON LIFTS WHEN RUNNING - TAG OUT/LOCK OUT!**

Per Magic Carpet® Operating Instructions:

“WARNING: THE CONVEYOR ELECTRICAL MUST BE LOCKED OUT BEFORE ENTERING THE AREA UNDER THE LIFT FOR SNOW AND ICE REMOVAL. NUMEROUS PINCH POINTS EXIST WHICH COULD CAUSE HARM IF THE CONVEYOR WERE TO BE OPERATED WITH PERSONNEL UNDER THE LIFT.”

2) We use socket head Allen Bolts on our Boardwalk® design access doors. These bolts must be installed before operating the lift.

3) As a reminder, OSHA compliance is the responsibility of the area owner.
